The Persistence of Magic

Concerto Grosso for Wind Ensemble and Live Electronics

Instrumentation:

Piccolo
Flutes 1 & 2 (first chair flute, soloist)
Oboes 1 & 2
Bassoons 1 & 2
Bb Clarinets 1, 2, & 3 (first chair clarinet, soloist)
Bass Clarinet
Alto Saxophones 1 & 2
Tenor Saxophone
Baritone Saxophone
Bb Trumpets 1, 2, & 3 (first chair trumpet, soloist)
Horns 1, 2, 3, & 4 (first chair horn, soloist)
Trombones 1 & 2
Bass Trombone
Euphonium
Tuba
Timpani
Percussion 1: Large tam-tam (shared with Perc. 2), Marimba
Percussion 2: Flexatone, Triangle, Suspended Cymbal, Large tam-tam
Percussion 3: Bass Drum, Brake Drum
Percussion 4: Snare Drum, Crash Cymbals
Percussion 5: Four Toms, Crotales, Glockenspiel, Wood Block
Computer/iPad Performer (triggering the cues shown in the soloists' parts)

Technical Requirements:

1. Mac computer running Max 6.1 or Max 7 and the provided software (contact the composer to obtain the software and technical support). Optional: iPad running Cycling74's Mira app, to control the computer remotely.
2. Audio interface with 5 or more mic inputs, minimum stereo output (6, 8, or more channels of output strongly preferred).
3. Five condenser microphones: two for solo flute, one each for solo clarinet, trumpet, and horn. Ideally, the flute microphones should be lavalieres, affixed to the instrument, with one near the head-joint and the other in the middle of the keys. The other mics should be positioned to capture the cleanest signals possible from the soloists.
4. Loudspeakers to match the number of outputs available. The speakers should be full bandwidth; dedicated subwoofers are unnecessary. For stereo performance, the speakers should be located on stage, as part of the ensemble. For surround performances—which are strongly preferred—the front pair of speakers should be on stage, in the rear corners of the ensemble. The remaining speakers should be positioned to surround the audience (e.g. halfway back and in the rear of the audience). Contact the composer for assistance with speaker positioning: various setups will require small adjustments to the software.

Performance Notes:

1. In the opening, Percussion 2 is asked to play bowed flexatone. The desired sound is a very high-pitched drone, which can slowly change in pitch. The flexatone can be challenging to control: if it sounds comical, use a bowed crotale instead (an F# crotale is a good choice).
2. In the opening, Percussion 3 is asked to play rubbed bass drum. The desired sound is a very low-pitched drone. Depending on the instrument's heads and other factors, it can be very challenging to elicit a constant tone via rubbing. It is acceptable to substitute a bass drum roll with soft beaters, if necessary.

Program Note:

Writer and futurist Arthur C. Clarke famously wrote, in his Third Law, "any sufficiently advanced technology is indistinguishable from magic." I spent the summer of 2004 living in Capitola, California, within quick walking distance of Monterey Bay. Having completed my doctorate in June, I felt free, for the first time in many years, to compose anything I wanted to compose. Reading one of the volumes of Stephen King's Dark Tower series, I was struck by a phrase he used: "the persistence of magic," to describe the continuing echoes in a place, of monumental events that occurred there. Something about the concepts of endurance, and of magic, spoke to me, and sitting on the beach, looking out across Monterey Bay, I began the initial sketches for The Persistence of Magic. However, I became busy with other projects, and dissatisfied with the way the work was going, and let it sit.

Almost ten years later, Scott Lubaroff approached me to write a work for wind ensemble that would also showcase music technology. I decided I wanted to include live electronics in the new work, capturing the sounds of some of the soloists in the ensemble and processing them live to create new textures and timbres, unachievable with acoustic means alone. In looking through my sketchbooks and old files for inspiration and good ideas, I came across my sketches for this work and realized that it would be a perfect fit. Current music technology is capable of incredible—nearly magical—feats, and returning to music that had lain fallow for almost ten years reminded me of the events depicted in the novel that inspired the title.

Many elements of the newly completed work are composed to play with the ideas of persistence, and of working magic. Structured as a concerto grosso in three continuous movements, the work sets a small group of soloists, augmented with technological magic, against the full ensemble. Musical fragments recur throughout the work, beginning with the motives introduced in the initial movement, "Incantation." The second movement, "Drawing the Circle," is a musical setting of a ritual, magical procedure, developing momentum and power. Finally, the third movement deals with the importance of persistence, and the final triumphs that it brings.
